

SKY 200S

Sterilizable Handle

Specially designed sterilizable handle which provide complete bacteria free surface.

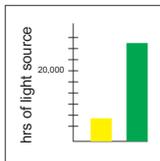

Shadow Free Light

Large ellipse light head and large light field diameter offers optimum illuminate in obstructed area and the symmetric shape of lamp head provides perfect shadow control.

Homogeneous Light Beam

The power its lights has been harnessed through a combination of finely honed lenses to deliver a homogeneous light.

Life of LED

LED service life is 25 time longer than halogen bulb.

Integrated with laminar flow

The disturbance of the air movement produced by the laminar flow is largely eliminated. The smooth surface contribute to fast and easy cleaning.

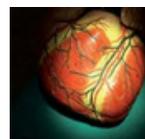

Constant Depth

The LED modules gives an excellent constant depth.

Focus Adjustment

The sterilizable handle is used for turning lamp holder for which the focus can be adjusted.

Colour Temperature

Adjustable colour temperature arranging from 3500 K - 5500 K

TECHNICAL SPECIFICATION

Max Light Intensity at 1m (Lux)	160,000
No. of LED's	80
LED's Life Time	>50,000
Dome Diameter	700mm
Colour Rendering Index (RA)	>92
Temp. Increase @ Head Area	2°C
Colour Temperature in Kelvin	3500 K , 4500 K , 5500 K
Focus Adjustment	Adjustable Manually
Control on Dome For Lux Adjustment	Digital
Light Field Diameter	150mm or more
Input Voltage	AC 220~230V / 50-60Hz

- ON/OFF
- White lightning level (UP/DOWN)
- Yellow lightning level (UP/DOWN)
- Endo mode
- Colour Temp. adjustment (3500 K, 4500 K, 5500 K)
